

Communicator Series

The Communicator series are noise canceling USB computer headsets that come in single (100) and dual (200) ear versions. All communicator series come with inline volume and mute controls. They are designed to compete with products costing five times as much, and they will perform as well or better than any other USB product made.

100 | Single Ear Version

200 | Dual Ear Version

We believe that users want high quality, durable headsets, and they do not need fancy packaging, or advertising, that will only raise the price of the products.

At TheONE our goal is to supply the best quality equipment at a cost that does not break our user's budgets.

We are innovators, and we are always looking to improve our products.

We will strive to continue to bring only the best products to market. Once you try our products, you will see why - All you ever need is
The ONE!

Communicator Series

Freedom Series

The T Series

Freedom Series

The Freedom series are Plantronics compatible units that feature inline mute and volume controls. They are noise canceling, and come in both single (100) and dual (200) ear versions. The quick disconnect works with any Plantronics amp or cord. The units are lightweight but very durable, and perform as well as any unit on the market regardless of price.

100 | Single Ear Version

200 | Dual Ear Version

The T Series

The T series units contain a very durable dial pad with volume and mute controls, along with a flash and redial button. The dial pad also features a record out, and a ringer control. The headsets are high quality noise canceling units that come in both single (T1) and dual (T2) ear versions. These units are built to the highest standard.

T1 | Single Ear Version

T2 | Dual Ear Version

The UniCord

The UniCord will allow the users of 99% of all phones on the market to use our headsets

Works with most desk phones featuring a standard RJ9 modular connector. Compatible with IP hard phones

Featuring inline Volume and Mute controls. Microphone amplification to boost transmit levels when connecting to low transmit volume phone systems.

Simple slide adjustment for easy setup
